We were very satisfied with the bathroom remodeling and many people contributed.

Dave Minter came and measured after we decided upon a shower. We were unsure it would fit. He also suggested the small window. We were having the window removed from the wall in back of the existing tub, but we really wanted a window. The small window above the shower surround was the answer to our problem. He introduced us to Ron Spiteri before the project began, and Ron came here the day it started and introduced Tim.

We had a concern with the placement of the dumpster and both Ron and Dave said someone would be here when it was delivered. Tim was here and directed the placement of the dumpster perfectly! Tim introduced Joe and they both did a wonderful job.

The placement of the grab bar in the shower is just perfect. They asked me twice about the location and all of their suggestions were excellent.

The trim in the bathroom is beautiful and the small windows look like it was always there. The towel bar and tissue holder and shower doors are just as they should be, thanks to you. The siding was repaired from the outside, and you would never know a window was removed.

The shelves in the closet are much nicer than the ones we had before, and we are enjoying the extra storage space.

The window removed was part of our alarm system, and the new window was wired by our alarm company, after the men installed it. Everyone was very helpful in keeping our alarm system operating the entire time of the remodeling.

Ron Spiteri and the men answered many of our questions and we appreciate all their concerns. Thank you to everyone involved in this project. We would definitely recommend DiGiorgi.
